

Build-to-Suits: A Capital Solution for Custom-Built Real Estate

In a build-to-suit transaction, W. P. Carey funds the construction of a new facility or the expansion of an existing one to meet the specifications of a prospective or existing tenant. Upon completion, the tenant enters into a long-term net lease, while retaining full operational control of the custom-built facility.

Build-to-Suit Benefits

Build-to-suits enable a prospective or existing tenant to:

- Construct a new facility, custom-built to its unique specifications with no upfront capital expense or equity required
- Preserve capital to be reinvested into its core business operations and growth objectives, while retaining full operational control of the facility
- Benefit from 100% deductibility of rental payments rather than being subject to interest limitations for traditional debt as defined by tax laws

About W. P. Carey

W. P. Carey Inc. (NYSE: WPC), one of today’s largest diversified net lease REITs, provides long-term sale-leaseback and build-to-suit capital solutions primarily for companies in the U.S. and Northern and Western Europe. We are well positioned with the capital and experience needed to maximize efficiency and ensure certainty of close on complex, single and multi-country deals that meet our investment criteria.
